Table of Contents

Preface 6

Introduction

Towards a Rigorous Combination of Space Geodetic Techniques
M. Rothacher 7

Combination Strategies and Issues for TRF / CRF / EOPs

Combination of Station Positions and Velocities
Z. Altamimi, C. Boucher, H. Drewes, R. Ferland, K. Larson, J. Ray, M. Rothacher 19

ITRS Center Views on Combination Issues
C. Boucher, Z. Altamimi 28

Remarks on Some Problems in the Combination of Station Coordinate and Velocity Solutions
H. Drewes, D. Angermann 30

TRF Combination at NRCan: Status Report
R. Ferland 33

Celestial Reference Frame Issues
J. Souchay, C. Ma, M. Feissel-Vernier 35

General Combination of EOP Series
D. Gambis, T. Johnson, R. Gross, J. Vondrak 39

EOP Alignment Campaign, IDS/IGS/ILRS/IVS EOP Combinations, Systematic Errors
A. Nothnagel, R. Dill, M. Feissel-Vernier, R. Ferland, R. Noomen, P. Willis 51

Consistency Analysis Between EOP Series and Reference Frames
D. Gambis, C. Bizouard 57

Issues of a Rigorous Combination

Conventions and Combinations
D. D. McCarthy, G. Petit 63

Impact of IAU Resolutions on Earth Rotation Parameters
N. Capitaine, D. D. McCarthy 66

Issues of a Rigorous Combination
J. Ray, S. Y. Zhu 73

Combination of Multi-Satellite Techniques at the Observation Level
S. Zhu, Ch. Reigber, F.-H. Massmann, H. Neumayer, H. Meixner, F. Flechtner 84

On Systematic Differences in Individual Solutions and IERS Products
Z. Malkin 87

Numerical Aspects of Combination at the Observation Equation and Normal Equation Level
M. Gerstl 89

IERS SINEX Combination Campaign
D. Angermann, D. Thaller, M. Rothacher 94

Multi-technique Combination of Time Series of Station Positions and Earth Orientation Parameters
Z. Altamimi, C. Boucher 102

Combination of Loosely Constrained Solutions
G. Bianco, R. Devoti, V. Luceri 107

IERS SINEX Combination Campaign: First Results at NRCan
R. Ferland 110

Rank Defect Analysis and Variance Component Estimation for Inter-Technique Combination
R. Kelm 112

Global Geophysical Fluids

The Global Geophysical Fluids Center (GGFC) of the International Earth Rotation and Reference Systems Service
B. F. Chao, V. Dehant, R. S. Gross, H.-P. Plag, R. D. Ray, D. A. Salstein, T. van Dam, T. van Hoolst, M. M. Watkins, C. R. Wilson 115

The GGFC Special Bureau for the Atmosphere of the International Earth Rotation and Reference Systems Service
D. A. Salstein 121

Reliability of Atmospheric Torque for Geodesy
O. de Viron, V. Dehant 125

Time Variable Atmospheric and Oceanic Signals in Excitation Functions of Polar Motion
J. Nastula, D. A. Salstein, B. Kołaczek 127

The GGFC Special Bureau for the Oceans: Past Progress and Future Plans
R. S. Gross 131

Comparison of Oceanographic Signals with SLR-Derived Gravity Observations
C. M. Cox, A. Au, J.-P. Boy, B. Chao 139

Oceanic Excitation of Polar Motion and Nutation: An Overview
A. Brzezinski 144

Possible Role of the Oceans in the Variations of Length of Day at High Frequencies
T. J. Johnson 150

The Hydrology Bureau of the Global Geophysical Fluids Center
C. R. Wilson, J. Chen 153

Time Variable Gravity Field: Using Future Earth Observation Missions for High Frequency De-Aliasing
T. Gruber, T. Peters 157

GGFC Special Bureau for Tides
R. Ray 161

Recent Work on Theoretical Modeling of Nutation
J. M. Ferrándiz, A. Escapa, J. F. Navarro, J. Getino 163

GGFC Special Bureau for the Core
T. Van Hoolst, V. Dehant, W. Kuang 168

GGFC Special Bureau for Loading: Current Status and Plans
T. Van Dam, H.-P. Plag, O. Francis, P. Gegout 180

Posters

Time Series of Site Positions and Datum Parameters
D. Angermann, B. Meisel, M. Krügel, H. Müller, V. Tesmer 199

IVS Pilot Project – Tropospheric Parameters
J. Boehm, H. Schuh 202

SINEX File Implementation in the VLBI Calc/Solve Analysis System
C. Ma, L. Petrov 204

Some Problems in the IERS Products from User's Point of View
Z. Malkin 207

Comparison and Combination of the Earth Orientation Parameters Submitted to the IERS Alignment Campaign 2002
E. Messerer, J. Boehm, H. Schuh 209

Combination of Terrestrial Reference Frames and ERP at University of Newcastle
K. Nurutdinov, P. J. Clarke, Ph. Moore 211

Determination of Station Coordinates and EOP from Combination of Different Techniques
J. Kostelecký, I. Pešek 214

Electromagnetic Core-Mantle Coupling
S. Ponsar, V. Dehant, T. Van Hoolst 216

Environmental Loadings: Effects on Height and Gravity
S. Zerbini, C. Romagnoli, L. Lago, B. Richter, D. Simon 219

IDS Analysis Campaign: current combination activity
J. J. Valette, L. Soudarin, Z. Altamimi 222

Conclusions

Recommendations and Action Items 233

Annexes

Annex 1 Programme of the Workshop 229

Annex 2 List of Posters 233

Annex 3 List of Participants 234
