Table of Contents

Foreword **5**
J. Souchay and M. Feissel-Vernier

Maintenance of the ICRF using the most stable sources **7**
A.-M. Gontier, E.F. Arias, and C. Barache

Future Realizations of the ICRF: Radio and Optical **21**
A. Fey and R. Gaume

Pulsars: timing reduction at Nançay's radio-telescope and construction of an astrometric catalog **29**
J. Souchay and I. Cognard

Source Structure **41**
D. A. Boboltz

Assessing astrometric quality: stability of the VLBI-derived extragalactic celestial frame **49**
M. Feissel-Vernier

Maintenance of the link to Hipparcos **73**
N. Zacharias

Astro-photometric properties of the ICRF with respect to catalogues of quasars **81**
J. Souchay, A. M. Gontier, and C. Barache

Tying the dynamical and extragalactic reference frames via millisecond pulsars **91**
M. Feissel-Vernier and I. Cognard

Lunar Laser Ranging: measurements, analysis, and contribution to the reference systems **97**
J. Chapront and G. Francou

Global consistency of IERS Earth orientation with the ITRS and ICRS: span 1988–2003 **117**
C. Bizouard

Comments on the VLBI connection between celestial and terrestrial reference frames by means of sidereal time **123**
M. Feissel-Vernier

Dissemination of ICRS products and information on ICRF radio sources **129**
A.-M. Gontier, A. L. Fey, D. A. Boboltz, S. Bouquillon and C. Barache

Annex: Share of task for operating the ICRS Center of IERS **133**
