November 21-22, 2011

3rd COL Working Group Meeting

- VLBI technique
- Software: VieVS
- Daily SINEX files (version n1): delivered on May 23, 2011
- Parameters:
 - Station coordinates
 - Quasars coordinates
 - 5 EOP: piece-wise linear offsets at 0h
 - Polar motion: x_{pol} , y_{pol}
 - UT
 - Nutation parameters: dX , dY
 - Horizontal tropospheric gradients (north and east): 2 hours interval
 - Zenith wet delay: 2 hours interval
